Item No.

Meeting Date: **May 2, 2019**

---

Pursuant to Airport Authority Policy 8.30, and acting in its delegated capacity as the Airport Land Use Commission (ALUC) for San Diego County, Airport Authority staff has issued the following consistency determinations per their respective ALUCPs:

**San Diego International Airport (SDIA) ALUCP**

**Construction of 104 Attached Residential Units at 777 Beech Street, City of San Diego**

Deemed Complete & Consistent on April 11, 2019

Description of Project: The project involves the construction of a 104 attached residential units.

Noise Contours: The proposed project lies outside the 60 decibel Community Noise Equivalent Level (dB CNEL) noise exposure contour. The ALUCP identifies all uses located outside the 60 dB CNEL noise contour as compatible with airport uses.

Airspace Protection Surfaces: The height of the proposed project structure will be approximately 152 feet above ground level, which will be approximately 303 feet above mean sea level (MSL). The proposed project is located outside the SDIA Threshold Siting Surface (TSS). The proposed project would be compatible with the ALUCP airspace protection surfaces, provided that the structure is marked and lighted in accordance with a determination of no hazard to air navigation issued by the Federal Aviation Administration (FAA) for the project and an aviation easement for airspace is recorded with the County Recorder. Therefore, as a condition of project approval, the structure shall be marked and lighted in accordance with FAA procedures and an aviation easement for airspace recorded with the County Recorder.

Safety Zones: The proposed project is located partially within Safety Zone 3 Southeast – Cortez Hill but mostly outside all safety zones. ALUCP Policy S. 10 states that when 50 percent or more of the building is located outside a safety zone, no safety restrictions apply; therefore, no safety restrictions apply for this project.

Overflight Notification: The proposed project is located within the overflight notification area. The ALUCP requires that a means of overflight notification be

provided for new residential land uses. In instances when an aviation easement is required, the overflight notification requirement is satisfied.

### **Gillespie Field ALUCP**

#### **Construction of Manufacturing Building with Office Space at 9702 Prospect Avenue, City of Santee**

Deemed Complete & Consistent on April 11, 2019

Description of Project: The project involves the construction of a 35,334 square feet building with 28,647 square feet of manufacturing and 6,687 square feet of associated office space.

Noise Contours: The proposed project lies within the 70-75 dB CNEL noise exposure contour. The ALUCP identifies manufacturing and office uses located within the 70-75 dB CNEL noise contour as conditionally compatible with airport uses, provided that the building is sound attenuated to 50 dB CNEL interior noise level. The ALUCP requires that an aviation easement for aircraft noise and height be recorded with the County Recorder. Therefore, as a condition of project approval, the building must be sound attenuated to 50 dB CNEL interior noise level and an aviation easement for aircraft noise and height be recorded with the County Recorder.

Airspace Protection Surfaces: The height of the proposed project structure will be 36 feet above ground level. The proposed project is in compliance with the ALUCP airspace protection surfaces because a determination of no hazard to air navigation has been issued by the FAA.

Safety Zones: The proposed project is located within Safety Zone 2. The ALUCP identifies manufacturing and office uses located within Safety Zone 2 as conditionally compatible with airport uses, provided that the project complies with the Floor Area Ratio (FAR) of 0.48 for manufacturing and 0.35 for office. The project proposes a FAR of 0.25 for manufacturing and a FAR of 0.06 for office, and therefore complies with the Safety Zone 2 FARs.

Overflight Notification: The proposed project is located within the overflight notification area, but does not involve any new residential use subject to overflight notification requirements.
