Airport Land Use Commission
**Report of Determinations of Consistency with Airport Land
Use Compatibility Plans**

Item No.
2

Meeting Date: **July 12, 2018**

Pursuant to Airport Authority Policy 8.30, and acting in its delegated capacity as the Airport Land Use Commission (ALUC) for San Diego County, Airport Authority staff has issued the following consistency determinations per their respective ALUCPs:

San Diego International Airport (SDIA) ALUCP

Construction of a Detached Residential Unit at 2535-2537 C Street, City of San Diego

Deemed Complete & Consistent on May 17, 2018

Description of Project: The project involves the construction of a detached residential unit.

Noise Contours: The project area lies within the 60-65 decibel Community Noise Equivalent Level (dB CNEL) noise exposure contours. The ALUCP identifies residential uses located within the 60-65 dB CNEL noise contour as conditionally compatible with airport uses, provided that the residences are sound attenuated to 45 dB CNEL interior noise level. Therefore, as a condition of project approval, the residence must be sound attenuated to 45 dB CNEL interior noise level.

Airspace Protection Surfaces: The proposed project is located outside the Threshold Siting Surface (TSS) and is in compliance with the ALUCP airspace protection surfaces because the project sponsor has certified that notice of construction is not required to the Federal Aviation Administration (FAA) because the project is located within an urbanized area, is substantially shielded by existing structures or natural terrain, and cannot reasonably have an adverse effect on air navigation.

Safety Zones: The project area is located outside all safety zones.

Overflight Notification: The proposed project is located within the overflight notification area. The ALUCP requires that a means of overflight notification be provided for new residential land uses. Therefore, as a condition of project approval, a means of overflight notification shall be provided.

Construction of 4 Attached Residential Units at 582-594 West Laurel Street, City of San Diego

Deemed Complete & Consistent on May 18, 2018

Description of Project: The project involves the construction of four attached residential units on a property with an existing detached residential unit to remain.

Noise Contours: The project area lies within the 65-70 decibel Community Noise Equivalent Level (dB CNEL) noise exposure contours. The ALUCP identifies residential uses located within the 65-70 dB CNEL noise contour as conditionally compatible with airport uses, provided that the residences are sound attenuated to 45 dB CNEL interior noise level. The ALUCP requires that an aviation easement for airport noise and height be recorded with the County Recorder. Therefore, as a condition of project approval, the residences must be sound attenuated to 45 dB CNEL interior noise level and an aviation easement must be recorded with the County Recorder.

Airspace Protection Surfaces: The proposed project is located outside the Threshold Siting Surface (TSS) and is in compliance with the ALUCP airspace protection surfaces because a determination of no hazard to air navigation has been issued by the Federal Aviation Administration (FAA).

Safety Zones: The proposed project is located within Safety Zone 3NE - Uptown. The ALUCP identifies residential uses located within Safety Zone 3NE - Uptown as conditionally compatible with airport uses, provided that the project complies with a density of 62 units per acre. Based upon the project size of 0.13 acres, the maximum compatible density would be 8 units. The project proposes 4 units in addition to the existing unit, and, therefore, the density of 5 total units complies with compatible density limitations of Safety Zone 3NE - Uptown.

Overflight Notification: The proposed project is located within the overflight notification area. The ALUCP requires that a means of overflight notification be provided for new residential land uses. In instances when an aviation easement is required, the overflight notification requirement is satisfied.

Construction of a Self-Storage Building at 2727 Kettner Boulevard, City of San Diego

Deemed Complete & Consistent on June 14, 2018

Description of Project: The project involves the construction of a 4-story self-storage building on a 0.9 acre lot with an existing office building.

Noise Contours: The proposed project lies within the 75+ decibel Community Noise Equivalent Level (dB CNEL) noise exposure contour. The ALUCP identifies self-storage uses located within the 75+ dB CNEL noise contour as compatible with airport uses.

Airspace Protection Surfaces: The proposed project is located within the Threshold Siting Surface (TSS). The maximum allowable height for a project on this site is approximately 126 feet above Mean Sea Level (MSL), and the structure is approximately 91 feet above MSL. Therefore, the project complies with the TSS. The proposed project would be compatible with the ALUCP airspace protection surfaces provided that the structure is marked and lighted in accordance with a determination of no hazard to air navigation issued by the Federal Aviation Administration (FAA) and an aviation easement for height is recorded with the County Recorder. Therefore, as a condition of project approval, the building must be marked and lit according to FAA procedures and an aviation easement for height must be recorded with the County Recorder.

Safety Zones: The proposed project is located within Safety Zones 2 East and 3 Northeast – Midway-Pacific Highway. The ALUCP identifies self-storage uses located within Safety Zones 2 and 3 as compatible with airport uses.

Overflight Notification: The proposed project is located within the overflight notification area, but does not involve any new residential use subject to overflight notification requirements.
