AMY GONZALEZ
GENERAL COUNSEL

Airport Land Use Commission
**Report of Determinations of Consistency with
Airport Land Use Compatibility Plans**

Item No.
2

Meeting Date: **February 1, 2018**

Pursuant to Airport Authority Policy 8.30, and acting in its delegated capacity as the Airport Land Use Commission (ALUC) for San Diego County, Airport Authority staff has issued the following determinations of consistency for land use actions with their respective ALUCPs in the preceding month:

San Diego International Airport (SDIA) ALUCP

Construction of Detached Residential Unit at 3336 Curtis Street, City of San Diego

Deemed Complete & Conditionally Consistent on January 16, 2018

Description of Project: The project involves the construction of a detached residential unit.

Noise Contours: The proposed project lies within the 70-75 decibel Community Noise Equivalent Level (dB CNEL) noise exposure contour. The ALUCP identifies residential uses located within the 70-75 dB CNEL noise contour as conditionally compatible with airport uses, provided that the residence is sound attenuated to 45 dB CNEL interior noise level. The ALUCP requires that an aviation easement for aircraft noise and height be recorded with the County Recorder. Therefore, as a condition of project approval, the residence must be sound attenuated to 45 dB CNEL interior noise level and an aviation easement must be recorded with the County Recorder.

Airspace Protection Surfaces: The proposed project is located within the Threshold Siting Surface (TSS). The maximum allowable height for a project on this site is approximately 182 feet Above Ground Level (AGL), and the structure is approximately 25 feet AGL. Therefore, the project complies with the TSS. The proposed project is in compliance with the ALUCP airspace protection policies because the project sponsor has certified that notice of construction is not required to the Federal Aviation Administration (FAA) because the project is located within an urbanized area, is substantially shielded by existing structures or natural terrain, and cannot reasonably have an adverse effect on air navigation.

Safety Zones: The project area is located within Safety Zone 2 West – Peninsula. The ALUCP identifies residential uses located within Safety Zone 2 West – Peninsula as conditionally compatible with airport uses, provided that the project complies with a density of 20 units per acre. The project site is 5,000 square feet

in area but is ensured the right to develop a single-family residential unit as a legal lot of record notwithstanding any other ALUCP limitation, provided that all other conditions of compatibility are observed.

Overflight Notification: The proposed project is located within the overflight notification area. The ALUCP requires recordation of an overflight notification with the County Recorder for new residential land uses, but does not require an additional overflight notification where an avigation easement is required.
