This meeting of the Airport Land Use Commission of the San Diego County Regional Airport Authority will be conducted pursuant to the provisions of California Assembly Bill 361 which suspends certain requirements of the Ralph M. Brown Act. During the current State of Emergency and in the interest of public health, all Commission Members will be participating in the meeting electronically. In accordance with the Assembly Bill, there will be no members of the public in attendance at the Commission Meeting. We are providing alternatives to in-person attendance for viewing and participating in the meeting. In lieu of in-person attendance, members of the public may submit their comments in the following manner.

### Public Comment during Board/Committee Meetings

If you'd like to speak to the Commission live during the meeting, please follow these steps to request to speak:

- **Step 1:** Watch the meeting via the live Webcast located at the following link, <https://www.san.org/Airport-Authority/Meetings-Agendas/ALUC?EntryId=13924>  
**PLEASE NOTE: There is approximately 20 seconds of lag time between the meeting and the Webcast.**
- **Step 2:** When the Chair introduces the item that you would like to comment on, (*or indicates that it is time for Non-Agenda Public Comment*), call into the public comment line by following the following directions :  
**REMINDER: Please do not call until the item you want to comment on is being discussed.**
  1. **Dial 1-619-737-2396**
  2. **When prompted, input Conference ID: [653 817 95#](#)**
  3. **You will then hear: "If you're the meeting organizer, press star now. You are now joining the meeting." Ignore this message.**

## Airport Land Use Commission Staff Report

Meeting Date: November 4, 2021

### Report of Determinations of Consistency with Airport Land Use Compatibility Plans

Pursuant to Airport Authority Policy 8.30, and acting in its delegated capacity as the Airport Land Use Commission (ALUC) for San Diego County, Airport Authority staff has issued the following consistency determinations per their respective ALUCPs:

#### San Diego International Airport ALUCP:

##### **Construction of Detached Residential Unit at 4741-4743 Niagara Avenue, City of San Diego**

Deemed Complete and Conditionally Consistent on September 23, 2021

Description of Project: The project involves the construction of a detached residential unit on a property with two existing residences to remain.

Noise Contours: The proposed project lies within the 60-65 decibel Community Noise Equivalent Level (dB CNEL) noise exposure contour. The ALUCP identifies residential uses located within the 60-65 dB CNEL noise contour as conditionally compatible with airport uses, provided that the residence is sound attenuated to 45 dB CNEL interior noise level. Therefore, as a condition of project approval, the residence must be sound attenuated to 45 dB CNEL interior noise level.

Airspace Protection Surfaces: The maximum height of the proposed project structure will be approximately 67 feet above mean sea level (25 feet above ground level). The proposed project is located outside the SDIA Threshold Siting Surface (TSS). The proposed project is in compliance with the ALUCP airspace protection surfaces because the project sponsor has certified that notice of construction is not required to the Federal Aviation Administration (FAA) because the project is located within an urbanized area, is substantially shielded by existing structures or natural terrain, and cannot reasonably have an adverse effect on air navigation.

Safety Zones: The proposed project is located outside all Safety Zones.

Overflight Notification: The proposed project is located within the overflight notification area. The ALUCP requires that a means of overflight notification be provided for new residential land uses. Therefore, as a condition of approval, a means of overflight notification must be provided.

## **Construction of 73 Attached Residential Units at 1620 Union Street, City of San Diego**

Deemed Complete and Conditionally Consistent on October 1, 2021

Description of Project: The project involves the construction of 73 attached residential units and associated parking.

Noise Contours: More than 50 percent of the gross floor area of the proposed project building lies outside the 60 decibel Community Noise Equivalent Level (dB CNEL) noise exposure contour. Per ALUCP Policy N.5, the noise standard for a project applies for the noise contour range within which more than 50 percent of the gross floor area of the building is located. The ALUCP identifies residential uses located outside the 60 dB CNEL noise contour as compatible with airport uses.

Airspace Protection Surfaces: The maximum height of the proposed project structure will be approximately 322 feet above mean sea level (250 feet above ground level) and the temporary construction crane will be approximately 371 feet above mean sea level (300 feet above ground level). The proposed project is located outside the SDIA Threshold Siting Surface (TSS). The proposed project would be compatible with the ALUCP airspace protection surfaces, provided that the structure and temporary construction crane are marked and lighted in accordance with a determination of no hazard to air navigation issued by the Federal Aviation Administration (FAA) and an aviation easement for airspace is recorded with the County Recorder. Therefore, as a condition of project approval, the structure and temporary construction crane must be marked and lighted in accordance with FAA procedures and an aviation easement for airspace recorded with the County Recorder.

Safety Zones: The proposed project is located outside all Safety Zones.

Overflight Notification: The proposed project is located within the overflight notification area. The ALUCP requires that a means of overflight notification be provided for new residential land uses. In instances when an aviation easement is required, the overflight notification requirement is satisfied.

## **Construction of Detached Residential Unit at 4928 Brighton Avenue, City of San Diego**

Deemed Complete and Conditionally Consistent on October 8, 2021

Description of Project: The project involves the construction of a detached residence and detached accessory garage.

Noise Contours: The proposed project lies within the 65-70 decibel Community Noise Equivalent Level (dB CNEL) noise exposure contour. The ALUCP identifies residential uses located within the 65-70 dB CNEL noise contour as conditionally compatible with airport uses, provided that the residence is sound attenuated to 45 dB CNEL interior noise level. The ALUCP requires that an avigation easement for aircraft noise and height be recorded with the County Recorder. Therefore, as a condition of project approval, the residence must be sound attenuated to 45 dB CNEL interior noise level and an avigation easement for aircraft noise and height be recorded with the County Recorder.

Airspace Protection Surfaces: The maximum height of the proposed project structures will be approximately 49 feet above mean sea level (30 feet above ground level). The proposed project is located outside the SDIA Threshold Siting Surface (TSS). The proposed project is in compliance with the ALUCP airspace protection surfaces because the project sponsor has certified that notice of construction is not required to the Federal Aviation Administration (FAA) because the project is located within an urbanized area, is substantially shielded by existing structures or natural terrain, and cannot reasonably have an adverse effect on air navigation.

Safety Zones: The proposed project is located outside all Safety Zones.

Overflight Notification: The proposed project is located within the overflight notification area. The ALUCP requires that a means of overflight notification be provided for new residential land uses. In instances when an avigation easement is required, the overflight notification requirement is satisfied.
