Subject Property Address:

Below will be completed by Airport Noise Mitigation Staff

According to the records of the San Diego County Regional Airport Authority, it appears the subject property resides (within / outside) the ____ decibel Community Noise Equivalent Level (CNEL) for the San Diego International Airport (SDIA). This decibel level is reflected of the current Part 150 Contour on the date this document was signed.

P.O. BOX 82776

SAN DIEGO, CA 92138-2776

SAN.ORG

The above property is in close proximity to a major airport. You should expect aviation activity above or near your property at all times of the day and night. Associated aviation activities include the arrival and departure of aircraft ranging in size and type, from small propeller airplanes to large jets. Residents may find associated aircraft noise and overflights to be annoying and / or disruptive to the enjoyment of the property.

Buyers are strongly advised to visit the property and surrounding area at various times of the day and night. Different conditions may impact their purchasing decision on an individual basis.

The State of California and the Federal Aviation Administration recognize the 65 decibel Community Noise Equivalent Level (CNEL) contour as the defined airport noise impact area (NIA).

However, specific individuals may have greater or lesser sensitivity to environmental noise. For questions regarding flight paths and/or aircraft noise, please contact the SAN Noise Abatement Office at (619) 400 – 2660.
