## Airport Land Use Commission Staff Report

Meeting Date: March 2, 2026

### Report of Determinations of Consistency with Airport Land Use Compatibility Plans

Pursuant to Airport Authority Policy 8.30 and acting in its delegated capacity as the Airport Land Use Commission (ALUC) for San Diego County, Airport Authority staff has issued the following consistency determinations per their respective Airport Land Use Compatibility Plans (ALUCPs). Authority Policy 8.30(3)(f)(2) states that any determination made by Authority staff in its delegated capacity shall be placed on the ALUC agenda for the next available meeting and shall be considered final if no further action is taken by the ALUC.

#### Gillespie Field ALUCP:

##### **Construction of Office at 10111 Prospect Avenue, City of Santee**

Deemed Complete and Conditionally Consistent on February 17, 2026

Description of Project: The project involves the construction of a modular office building of 1,400 square feet on a property of 2.12 acres with existing modular office and storage buildings to remain.

Noise Contours: The proposed project lies within the 70-75 decibel Community Noise Equivalent Level (dB CNEL) noise exposure contour. The ALUCP identifies office uses located within the 70-75 dB CNEL noise contour as conditionally compatible with airport uses, provided that the building is sound attenuated to 50 dB CNEL interior noise level. The ALUCP requires that an aviation easement for aircraft noise and height be recorded with the County Recorder. Therefore, as a condition of project approval, the building must be sound attenuated to 50 dB CNEL interior noise level and an aviation easement for aircraft noise and height must be recorded with the County Recorder.

Airspace Protection Surfaces: The maximum height of the proposed project structure will be approximately 389 feet above mean sea level (15 feet above ground level). The proposed project is in compliance with the ALUCP airspace protection surfaces because the project sponsor has certified that notice of construction is not required to the Federal Aviation Administration (FAA) because the project is located within an urbanized area, is substantially shielded by existing structures or natural terrain, and cannot reasonably have an adverse effect on air navigation.

Safety Zones: The proposed project is located within Safety Zone 5. The ALUCP identifies office uses located within Safety Zone 5 as conditionally compatible with airport uses, provided that the project complies with an intensity of 200 people per acre (or 400 people per acre with risk reduction policy objectives) at an occupancy factor of 215 square foot per person and 70 percent maximum lot coverage. The ALUCP represents these limitations as a maximum floor area ratio of 0.99 (or 1.97 with risk reduction). Therefore, as a condition of project approval, the building must comply with these intensity limits as specified by the ALUCP.

Overflight Notification: The proposed project is located within the overflight notification area but does not involve any new residential use subject to overflight notification requirements.

Interests Disclosure: The property is owned by PS Land LLC, whose agent is disclosed as Michael Shaw of La Mesa. The tenant is AT&T, whose project manager is disclosed as Clint Logsdon of San Diego. The architect is Studio J Chung of San Diego. The electrical engineer is Turpin & Rattan Engineering Inc. of La Mesa. The manufacturer is Phoenix Modular of Phoenix, Arizona. The pad, pier, and anchor designer is Pacific Mobile Structures of Menifee and Acumen Engineering Design LLC of Surprise, Arizona.
